

Cyclopital3D

Lighted Print Viewer

The First 3D Print Viewer with perfect
LED lighting!

- Perfect for modern sized prints made with the Fuji W3/W1!
- Detachable print holder allows easy viewing of standard 4 x 6 prints or photo books.
- Instructions included to format for easy printing at your local shop. Print holder accommodates 10 prints at once.
- Computer-free, easy viewing!
- Focus adjustment allows glasses-free viewing for most people.
- Tripod mount for tabletop viewing
- Crisp, bright viewing system that anyone can use comfortably.
- * (not compatible with antique-sized cards)

Finally, you can have a high-quality 3D viewer that allows you to easily view your modern 3D photos, anywhere. Now, you and your friends can enjoy stunningly immersive wide-angle viewing with bright, vibrant color quality that only this viewer provides.

Benefits, Features, & Specifications:

- Efficient, white LED lamps provide bright, uniform illumination. Color temperature is 5000K
- Portable, 6 hours of continuous viewing between charges on two AA batteries.
- Stunningly wide 47° field of view accommodates ortho-stereo viewing for photos taken with the Fuji W3, W1 or other digital cameras capable of capturing wide angle stereo photos
- Fully coated, precision optics with large achromatic lenses and collapsible eye-cups to block stray light
- Image size is 61.25mm x 48mm (per side) centered on standard 4 x 6 prints with 2mm center spacing. Template for formatting with StereoPhoto Maker (SPM) included
- Size: 146 x 90 x 115mm (5.75 x 3.5 x 3.5") WxHxD
Print holder 160 x 102 x 23mm (6.3 x 4 x .9") (WxHxD)
- Weight with batteries: 510 grams (18oz with batteries)

*If your audience doesn't say, "It's like I'm there!"
then you need a better viewer.*
