NEW!

Stereo Base Extender for Sony DEV-5 3D Digital Recording Binoculars

Add greater depth to your 3D recordings!

By Increasing the Stereo Base (lens spacing) from 31mm to 135mm you can record subjects that are 4x further away while enhancing the 3D effect with increased depth!

The Cycloptial3D Stereo Base Extender (SBE) is perfect for maintaining accurate depth portrayal when subjects are more distant from the camera, such as: wildlife, band or theatrical performances, sporting events, weddings or portraits.

The 31mm fixed lens spacing of the Sony DEV-5 limits how far away from the camera your subject can be while still achieving a high quality 3D image that displays adequate depth. As you get farther away from your subject parallax decreases, thus decreasing the 3D effect in the image.

The SBE uses perfectly aligned high quality front surface mirrors to effectively increase the stereo base from 31mm to 135mm. This lengthening of the stereo base allows you to get 4X further away from your subject while still maintaining an optimal level of parallax.

This SBE is only needed for subjects farther than about 4m from camera. It is important to remember that your subject should generally be the closest object in the scene. When using the SBE, objects in the foreground closer than 4m could cause excessive deviation and make the image uncomfortable to view in 3D, depending on the background.

Benefits and Features:

- Increases the Stereo Base (lens spacing) from 31mm to 135mm
- Record subjects that are 4x further away while enhancing the 3D effect with increased depth.
- Easily attaches to the tripod mount of the camcorder
- Sealed mirror chambers
- Tripod mount positioned for optimal balance
- Anti-reflective glass covers on front
- Size: 252x125x198mm (WxHxD)
- Weight: 1.07kg / 2lb 6oz

Price: \$429

****Usage tip:** To use the adapter you will need to zoom in until there are no obstructions seen on the display- you will see the black sides of the adapter until it is appropriately zoomed in.

****Note:** This unit is NOT waterproof. If you get it wet, it is possible that condensation could result inside, which is difficult to eliminate.

Warranty

Your adapter comes with a Limited Warranty against defects in workmanship and materials for 30 days from the date of purchase. The limited warranty does not apply if the product has been damaged by accident, mishandling, misuse, abuse, or alteration.
