FOR IMMEDIATE RELEASE

NEW PRODUCT ANNOUNCEMENT Filter & Lens Adapter for Sony 3D Camcorders HDR-TD30V & HDR-TD20V

FORT COLLINS, CO. May 15, 2012. Cyclopital3D has introduced a new Filter/Lens/Flash Adapter for the Sony HDR-TD30V and HDR-TD20V 3D camcorders. This new adapter enables 3D content creators to use more varied techniques and equipment to produce fantastic new 3D content.

Every serious filmmaker and photographer understands the benefits of using polarizers and creative filters to enhance their results- and this new adapter from Cyclopital3D makes it possible. The Filter/Close-up Adapter enables the use of circular shaped filters, close-up lenses and a macro ring flash for producing amazing macro 3D footage. The set also includes a removable lens hood for shading the lens of the camera and a set of close-up/macro lenses.

This new Filter/Close-up Lens Adapter compliments the existing line of 3D camera adapters offered by Cyclopital3D and will become a valuable tool for film-makers at all levels! More information and sample footage using a polarizer and macro lens can be found at www.cyclopital3d.com.
