

Cyclopital3D

Cy-3D iPad Viewer

3D Viewing with total immersion makes you feel like you're in the picture!

There is nothing quite as immersive and realistic as looking at 3D images through a stereoscope!

The Cy-3D iPad Viewer allows you to share an unlimited amount of images and video with ease.

Features and Benefits:

- 40 degree horizontal field of view uses full screen width
- Super fast image scrolling
- Adjustable inter-ocular and focus
- High quality prismatic achromatic lenses that are fully coated for anti-reflection
- Shows video in perfect sync
- No need to reformat pictures if you already view in parallel/ side-by-side format using the standard iPad software (iPad image viewing software icon is called photos).

Operation instructions:

- Turn iPad on and find the folder of pictures you want to view
- Slip iPad into the back of the Viewer
- Adjust the focus by turning the round knob on the side of the eyepiece
- Adjust inter-ocular spacing by sliding each eyepiece separately with your fingers as needed. Eye-guards can be folded back for people who need to wear glasses
- Use your finger on the bottom of the screen to scroll pictures
- Works best with 3rd generation Retina iPad because of the screen resolution
- Use built-in iPad photo viewing software. Use i3D Steroid software if zooming is desired which is available from the app store, developed by Masuji Suto author of StereoPhoto Maker.
- Lenses can be easily removed for cleaning by gently pulling them to "pop" them out of place

Warranty

All Cyclopital3D products come with a Limited Warranty against defects in workmanship and materials for 30 days from the date of purchase. The limited warranty does not apply if the product has been damaged by accident, mishandling, misuse, abuse, or alteration.
